For example 2000pF capacitor offers 1.5MΩ to 50Hz but 150Ω to 500kHz. Thus coupling capacitor allows carrier frequency signal to enter the carrier equipment. To decrease the impedance further and make the circuit purely resistive so that there is no reactive power in the circuit, low impedance is connected in series with coupling capacitor to form resonance at carrier frequency. Go to ...

There is a need to apply lean approaches in construction projects. Both BIM and IoT are increasingly being used in the construction industry. However, using BIM in conjunction with IoT for sustainability purposes has not received enough attention in construction. In particular, the capability created from the combination of both technologies has not been exploited.
