To test whether we observed more 10-bp sense:antisense overlaps than expected by chance, we randomly sampled 18 positions within the TART-like region of *nxf2* and counted how many of the 18 positions also had a 10-bp sense:antisense overlap with at least 1 piRNA. We repeated this process 1,000 times and determined the number of times where the random sample had the same or more 10-bp sense ...

New discovery could help improve cancer vaccines. Jeff Ward and Chris Miller are members of a global consortium that has identified features of tumor neoantigens that trigger T cells to attack the cancer and leave healthy tissue untouched. They used computer modeling to accurately predict 75% of effective neoantigens and eliminate 98% of ineffective mutant proteins in melanoma and a common ...
